

11 REASONS BILL C-36 SHOULD STOP

1. Removes the rule of law.
2. Shifts control to bureaucrats.
3. Allows for unconstitutional search and seizures.
4. Foreign laws are adopted without debate.
5. Violates civil and Charter rights.
6. Shifts power from provinces to federal government.
7. Bureaucrats determine guilt; not courts.
8. Removes court supervision.
9. Abolishes the law of trespass.
10. Non-compliant with our constitution.
11. Inconsistent with laws our courts say we have.

The Natural Health Products Protection Association (NHPPA) is a federally incorporated, non-profit organization devoted to protecting Canadians' access to natural health products. The Association lobbies government, publishes information and advises the public. Its experts support natural health stakeholders as changing legislation impacts their livelihoods.

SUSPEND THE NHP REGULATIONS

Sign the national petition that will help make the Charter of Health Freedom law. Understand that the Charter of Health Freedom will set natural health products apart from drugs under the law in Canada. The current NHP Regulations put us all at risk. Government Regulations endanger the lives of people who rely on natural health remedies and want to choose natural health products over pharmaceuticals. The NHP Regulations are costing us our freedom of choice; our access to quality innovative products; our traditional and cultural medicines; our personal sovereignty; and in some cases, they are costing lives. We believe that the the public and industry do not need to compromise.

**Join the movement that says 'No' to restricting
our access to natural health products**

The Charter of Health Freedom is a starting point for resolving the regulatory crisis. The Charter effectively regulates for fraud, adulteration and risk within a general presumption of safety for natural products, in the absence of substantial and compelling evidence of harm. The Charter assumes the freedom of individuals to choose how to achieve health as a fundamental right.
