

# The Charter of Health Freedom Will...

Ensure that people's fundamental right to manage their own health is protected

Secure all forms of Natural and Traditional Medicine treatments and Treatment Devices

Create appropriate regulations for the natural health industry, recognizing that vitamins, minerals and herbs cannot be treated as drugs

Address issues of quality control and labeling

Operate forever under Canadian Law, and cannot be undone by future agreements with other countries or Trade Organizations

Create an innovative **Ministry of Wellness** within Parliament, to ensure that the Charter's principles and regulations are consistently upheld

The Charter was written by Canadian constitutional lawyer Shawn Buckley, President of the Natural Health Products Protection Association

For information and to download a copy of the Charter and/or Petition, please visit:

## Why Do We Need the Charter of HealthFreedom?

Current government regulations are unreasonable and restrictive to health, business and personal freedoms

70% of Canadians use natural health products and their choice in medicine is under direct assault

At a time when Canadians want increased access to natural and traditional treatments, they are becoming increasingly unavailable

Since 2004, over 20,000 safe, natural health products have been removed from the Canadian marketplace and that number is increasing

Our current legislation treats common vitamins, minerals and herbs as *dangerous* drugs

Under the existing legislation, an est. 75% of all natural health products in Canada could become *illegal* substances

**Your freedom to use natural health products to treat yourself or your children is being taken away**

Without natural health products **you will be forced to use chemical pharmaceuticals**

### Act now and make a difference!

Sign the Charter Petition and Donate to the NHPPA

**Call and write to your MP. Ask them to READ and SUPPORT the Charter of Health Freedom**
