

PLEASE HELP SAVE MY NHPs

Dear Mr. Prime Minister:

Please help save NHPs (Natural Health Products) made in Canada. Here is the backstory...

Recognizing NHPs are 240 times safer than our everyday groceries, informed + elected officials have continuously promised food style regulation for NHPs since 1999.

Unfortunately, the unelected lifetime bureaucrats at Health Canada are progressively implementing Big Pharma's plan to monopolize all therapeutic products by strangling ultra safe CANADIAN MADE NHPs with dangerous + synthetic drug style regulation. This means:

- A.** New HUGE regulatory taxes on each NHP made in Canada
- B.** Dramatically higher shelf prices for each NHP sold in Canada
- C.** Discontinuation of many NHP brands and products made in Canada
- D.** Loss of Personal Health Freedom + Choice for Canadians*
- E.** Loss of Canadian jobs + tax revenue

To add insult to injury – Health Canada is encouraging Canadians to go online and import/purchase directly (via personal importation exemption) from American websites that ship identical NHPs (which are regulated as food in the USA) directly to Canadians – thus bypassing the Canadian economy + killing domestic employment.

PLEASE stop the unelected Lifetime Health Canada bureaucrats from needlessly raising prices + killing my NHPs with synthetic drug regulations.

Deaths per year in Canada

10,000

From prescription drugs under doctor's supervision
(The Journal of the American Medical Association)

240

From Food Related Illness
(Public Health Agency of Canada)

0 (Zero)

From Natural Health Products
(Orthomolecular Medicine News)

NHP's are safer than food!

DO YOU WANT MY VOTE?

I am asking you to write your Member of Parliament to tell them you want them to:

1. Stop Health Canada bureaucrats from strangling NHPs with HUGE administrative fees (so called "cost recovery" for a needless bureaucratic make-work program) and discriminatory labeling laws.
2. Repeal sections 500-504 from Bill C-47
3. Stop Health Canada from regulating ultra safe NHPs as dangerous synthetic drugs – as per recommendations from the Standing Committee on Health.
4. Appoint a Natural Health Product Ombudsman.

For a comprehensive details and a 36-page discussion paper by a constitutional and regulatory law expert, Shawn Buckley, and guides on how to write to your elected officials:
