

NATURAL HEALTH PRODUCT PROTECTION ASSOCIATION PRESENTS:

HEALTH CHARTER TOUR

&

THE WORLD'S Greatest Health SHOW

OCTOBER 4TH-25TH, 2025

Dear MP,

The Charter of Health Freedom (Health Charter) is a citizen initiative to protect our access to natural remedies and to enable us to make the best health decisions for our families.

During the World's Greatest Health Show, Canadians will have the opportunity to share how their very lives depend on natural remedies. Many of us are only alive today because of natural remedies. Many more of us are only healthy because of natural remedies. Our access to natural remedies is a life and death issue.

**Enough is enough. Do your job. Protect us from Health Canada.
Pass the *Health Charter* into law.**

nhppa.org/health-charter-tour

As a voter residing in the [redacted] postal code, I am demanding that you pass the **Charter of Health Freedom (*Health Charter*)** into law (charterofhealthfreedom.org).

1. The ***Health Charter*** codifies the health rights our Courts say we have.
2. The ***Health Charter*** requires a balanced risk analysis in the regulation of natural remedies. A balanced risk analysis is required to get the best health outcomes.
3. The ***Health Charter*** creates the Ministry of Wellness to protect and promote our access to natural remedies.
4. The ***Health Charter*** frees us from the dangerous drug model. Under the drug model it is illegal to treat serious health conditions with anything but novel chemicals. This does not lead to good health outcomes. The monopolies of the pharmaceutical companies must end.
5. The ***Health Charter*** will save lives. Health Canada restricts our access to natural remedies which has led to death and suffering. Canadians will share during the Charter Tour that they are only alive because of natural remedies. They are sharing this truth to drive home to you that our access to natural remedies is a matter of life and death. Enough is enough!
6. The ***Health Charter*** will end the censorship of truthful health information. The law needs to state that all information about a drug, chemical or natural, must be shared with the public. Canadians need truthful health information to make good health decisions.

The *Health Charter* is the most important health initiative in our lifetime. Do your part. Make the *Health Charter* law.
