

THE RIGHT TO TREAT YOUR HEALTH NATURALLY IS UNDER THREAT

The Charter of Health Freedom is the solution
to protect your access to natural health
products, permanently

Protecting Your Health Freedom

Health Canada has repeatedly sought to impose pharmaceutical-style regulations on the natural health industry without considering the negative repercussions. This stance contradicts the recommendations made by the Standing Committee on Health following their coast-to-coast hearings, as well as the wishes of Canadians, who desire continued and increased access to natural health products.

The Solution

The Charter of Health Freedom is proposed legislation that gives natural health products, traditional medicines, and low risk medical devices their own Act.

The Charter of Health Freedom protects our access to natural health products and traditional medicines by creating a **separate legal category** for them. The Charter also appoints a separate **Ministry of Wellness** whose purpose is to protect and promote access to natural treatment options.

The Charter of Health Freedom would stop the current regulatory crisis. It provides a **permanent solution** to safeguard your access to natural health products, like vitamins, minerals, herbs, and homeopathic remedies.
